Use water spray to drench smoldering elastomer. Product may melt after ignition to form flammable liquids. Burning produces intense heat, dense smoke and toxic gases such as carbon monoxide, oxides of nitrogen and traces of hydrogen cyanide.

SECTION VI: ACCIDENTAL RELEASE MEASURES

If material is released: pick up and handle as any other inert solid material
Waste Disposal: Not considered a hazardous waste

SECTION VII: HANDLING AND STORAGE

Always decontaminate after use. When not in use, store with plastic film applied for long life. Keep out of direct sunlight.
Store in dry area. Do not store near open flame, high heat, strong oxidants, or halogenated hydrocarbons. Polyurethane, when heated, becomes very sticky and will burn. Use self-contained air masks to enter smoky area in the event of fire. Adequate ventilation is required to remove decomposition products when temperature exceeds melting point. Avoid contact with melted product.
