

# 1000 mL No Touch Dispensing System

9961BLK Black

9960GRA Dove Gray

## Top-dispensing in an automatic dispenser *Less waste when dispensed, no leaking at the valve*

The EZ Hand Hygiene No Touch is activated from the upper part of the dispenser, which lets users see the amount of product being dispensed and reduces waste caused by over-dispensing. And, by placing the valve at the top rather than the bottom of the dispenser, the risk of leaking at the valve is eliminated.

### **EZ Hand Hygiene No Touch also offers these advantages:**

- **Wide variety of Foam Hand Soaps and Hand Sanitizers**
- **Dispenses quickly when hand is placed under the sensor**
- **Uses 6 AA batteries (included) – no tools needed to change**
- **LED indicator lights up blue when dispensing and red when batteries are low**
- **Secured keyed locking option included**
- **Durable ABS plastic housing**
- **Large view window with product identification label**
- **Refill labels are in English, French and Spanish**
- **Easy to install and maintain**

Keyed locking option

Inside view

Battery compartment

6 AA batteries (included)

Multilingual labeling

*All Hand Soaps, Hand Sanitizers and Hair & Body products are
