8-Drum SpillPal™ Portable Containment Unit #SPAL8 - 4' x 8' x 3", 1 each/package

A SpillPal unit with flexible sidewalls provides quick, portable spill containment — a great alternative to hard poly pallets that must be moved with a forklift.

- Provides versatile, portable spill control during temporary storage of drums, machine parts, tanks and generators

- Can also be used as a washdown pad or pumping station

- Light, foam sidewalls spring back to their original shape after any pressure is applied; safe for drive-overs from handtrucks or forklifts

- Affordable, portable and easy to set up

- Reusable containment can be folded and stored to save floor space

- No ramps or other accessories are required for usage

- To help keep items out of contained liquids, optional grates can be added (grates not included, use one grate per every two drums; do not drive over SpillPal when grates are in place)

- Resists most chemicals; check your specific chemical compatibility under "Technical Resources" at spilltech.com

- Available in multiple configurations

SPAL8 Specifications
